SEAL OF DISAPPROVAL

ON FRIEDMANN "CURE" United States Public Health Service Makes Report of Investi-gation.

WASHINGTON. November 6.—The seal of official disapproval has been placed upon the tuberculosis "cure" brought to this country in 1913 by Dr. Friederich F. Friedmann, of Berlin. The announcement was made to-day by the United States Fublic Health Service in making public an abstract of the report of its investigations in hospitals and laboratories where tests of the Friedmann cultures were made. It declares that conclusions of the American physicians are in line with previous reports, both in this country and abroad, "which have refuted Dr. Friedmann's claim to the discovery of a specific cure for tuberculosis."

One-fourth of all cases treated under the observation of American physicians developed running sores at the point of injection of the "cure," the abstract states, adding that Dr. Friedmann admitted this to be unfavorable to effecting a cure, but declared his method of injection had overcome that obstacle. The report further states that the bacteria g ms used for injection by Dr. Friedmann "show that the germ is different from varieties of tubercle bacilit commonly known at the present time.

No specific cases are reported in the abstract, made public, nor is any mention made of Dr. Friedmann's method
